

Business Continuity Plan Development

Why you need this program?

The main focus of this program is to provide you with a clear outline of a business continuity framework tailored to your organisation.

The framework can then be used to provide other team members greater awareness of the methodology and the contents of the plan.

Additionally, a partially populated BCP template will be provided so that you can continue to populate it in the future.

Highlights

- **A high-level methodology to develop your own Business Continuity Plan (BCP)**
- **A customised Business Continuity (BC) template**
- **Mentoring and guidance to complete the plan**

The speed with which modern business is transacted means that a disruption of only a few hours can have a catastrophic impact on the profitability and reputation of the organisation.

Putting in place a business continuity plan will help you to avoid financial losses, meet legal requirements, protect the safety of assets including employees, and mitigate negative publicity, just to name a few.

Program features

The program provides your business with the following:

- *A day with an IBM consultant to explain the step by step process for creating a business continuity planning framework*
- *A review of any existing plans for viability and completeness and the provision of recommendations to address any gaps*
- *The provision of a customised BCP template for your on-going use.*

After completion, we will facilitate a walkthrough of the draft BCP to identify any assumptions and gaps and to verify the appropriateness of the plan from a documentation point of view.

Business Continuity Maturity Level:
