

Test Planning Workshop

Highlights

- **Insights into best practice for preparing and executing test plans**
- **Provision of test plan and test report template**

Testing helps you confirm that your Disaster Recovery Plan will be connected and robust if you ever need it. However, how you set up the test is even more critical in ensuring that the results are in line with expected outcomes from the test.

Why you need this workshop?

The key objective of this one day workshop is to brainstorm and discuss particular issues surrounding testing your organisation's DRP.

During the workshop discussion our consultant will provide their subject matter knowledge and experience in writing test plans, to ensure you get a tailored and well setup test plan.

After the workshop you will then be able to use a test plan and a test report for future tests.

Workshop features

The workshop provides your business with the following:

- *Subject matter knowledge, experience and thought leadership in writing test plans, preparing for tests, facilitating and managing tests*
- *After the workshop you will be provided with a test plan template and a test report template that can be used for future tests that your team conducts.*

Business Continuity Maturity Level:
