IT SOLUTIONS DESIGNED WITH ONE GOAL: SIMPLICITY

IBM System x™ Whatever your IT needs, we have servers to match.

As a growing business, you face the need to simplify your IT. IBM can give you a whole host of easy-to-implement, and even better, easy-to-own solutions. There's an IBM solution for everyone. With all the support you need to see it through, like training, systems management and 24x7 warranty. IBM System x. Powered by the Intel® Xeon® Processor. With features like Calibrated Vectedored Cooling technology, which allows dual paths of air to each component, thereby improving uptime and reducing unwanted heat generation. IBM servers. Simple yet powerful. **Innovation made easy.**

IBM System x3200 (4362ILS)

- Mini Tower
- Dual-Core Intel® Xeon® Processor 3040 (1.87GHz)
- 2 x 1MB L2 Cache
- 512MB PC2-5300 667MHz ECC DDR2 SDRAM (Max 8GB, 4 DIMM Slots)
- 250GB SATA HDD
- 48x CD-ROM

Go Green with IBM BladeCenter Technology.

Buy an IBM BladeCenter H chassis & JS blade combo and double up energy efficiency with a **FREE** second JS Blade server!

Bringing the POWER of EnergyScale technology to the Blade.

IBM BladeCenter® supports a wide selection of processor technologies and operating systems to allow clients to run all of their diverse workloads inside a single architecture. It is designed to reduce complexity, simplify IT management, and increase flexibility while driving down total cost of ownership.

IBM BladeCenter JS21

For success in demanding IT environments, organizations require innovative servers delivering good performance and value. The IBM BladeCenter JS21 blade server, a feature-rich, pre-configured blade, is the answer to meet the stringent requirements of organizations for advanced technology. The JS21 blade server delivers many leading-edge technologies—support for the IBM AIX® and Linux® operating systems, IBM Advanced POWER™ Virtualisation (APV) and Altivec™ SIMD acceleration functionality—in a single, highly reliable, high-performance, yet cost-efficient blade server.

IBM BladeCenter JS21 is

- The premier blade solution for 64-bit UNIX®, HPC Linux® clusters and server consolidation
- Now available as a PowerPC-based 2.5 GHz 4-core Symmetric Multi-processing (SMP) for value-oriented clients
- Compatible with IBM BladeCenter for deployment flexibility
- Configurable to take advantage of virtualisation technologies to help increase utilisation and decrease costs

IBM BladeCenter JS22

Recently launched across the globe, the IBM BladeCenter JS22 blade server is powered with features of built Advanced POWER Virtualisation and EnergyScale™ technology to manage energy consumption. The exceptional price/performance in a virtualised environment; breadth of available applications; reliability, availability, serviceability (RAS) characteristics; energy efficiency; and leadership virtualisation of the IBM BladeCenter JS22 makes it a highly desirable blade server for organisations of any size.

With IBM BladeCenter JS22, you can

REALIZE INNOVATION

- Leadership HPC performance
- Integrated accelerators (Decimal Floating-Point and Altivec™ SIMD for highly parallel applications)

MANAGE GROWTH COMPLEXITY AND RISK

- Leverage the latest IBM BladeCenter chassis and technologies
- Choice of Operating systems: AIX® and Linux® applications
- Superior Availability, Reliability and Security provided by POWER6™, AIX 6 and System p™ Virtualisation

In conjunction with the new product launch, IBM is giving attractive offers to its customers. So double up energy efficiency with these offers now!

Offer 1:

Buy a IBM BladeCenter H chassis + JS21 (4 CPUs, PowerPC 2.5GHz, 4GB Memory, 73GB SAS) and get a JS21 of similar configuration for FREE!

RM42,140

Offer 2:

Buy a IBM BladeCenter H chassis + JS22 (4 CPUs, Power6 4.0GHz, 4GB Memory, 73GB SAS) and get a JS22 of similar configuration for FREE!
